

Customer Policy

Sample document for testing purposes

1 1. Purpose and Scope

This policy describes the service standards and responsibilities that apply when Sample Organization interacts with customers. It is intended for general testing and may be adapted to fit a specific business, product, or jurisdiction.

2 2. Customer Service Standards

- Treat every customer with courtesy, patience, and respect.
- Provide accurate, clear, and timely information.
- Avoid promising outcomes, timelines, or refunds that have not been authorized.
- Protect customer information and discuss account details only through approved channels.
- Record material complaints, commitments, and resolutions in the designated system.

3 3. Communication

Customer communications should use plain language and identify the next expected step. Standard requests should receive an acknowledgement within one business day. If a request requires investigation, the customer should receive a progress update at least every three business days until closure.

4 4. Complaints and Escalation

Customers may submit complaints through support, email, or an approved service channel. The receiving employee must acknowledge the complaint, summarize the issue, and assign an owner. Urgent safety, privacy, billing, or legal concerns must be escalated to a supervisor immediately.

5 5. Returns, Refunds, and Adjustments

Returns and refunds are handled according to the applicable product terms. Employees must verify the order or service record before making an adjustment. Exceptions require documented supervisor approval. Customers must be informed of the decision and any expected processing time.

6 6. Accessibility and Fair Treatment

Services must be delivered without discrimination. Reasonable accessibility requests should be accommodated whenever practicable. Employees must not retaliate against a customer for raising a concern, requesting an accommodation, or providing feedback.

7 7. Privacy and Records

Only the minimum information needed to resolve a request should be collected. Customer records must be stored in approved systems and retained according to the organization's retention schedule. Information must not be copied to personal devices or shared with unauthorized persons.

8 8. Policy Administration

The Customer Service Manager owns this policy and reviews it annually. Questions should be directed to the customer support lead. Violations may result in coaching, corrective action, or escalation under applicable organizational procedures.
